

List of Contributing Experts

The authors would like to thank the support of the experts, who filled questionnaires, attended workshops and provided additional comments for the data quality factors, thresholds and the workflow. The contributing experts are listed here in alphabetical order of their last name. In parentheses we show the institution they represented and the country they are based in while they supported the generation of the data quality factors:

- Rick Babicz (EdgeTech, UK)
- Jacek Beldowski (IOPAN, Poland)
- Elena Berndt (50Hertz Transmissions, Germany)
- Jack Brighthouse (ALM Geophysics, UK)
- Liesbet van der Burght (360survey, Belgium)
- Arno Duijster (TNO, Netherlands)
- Dorthe Reng Erbs-Hansen (Vattenfall Vindkraft/Ørsted, Denmark)
- Andreas Franz (Sea Terra, Germany)
- Ewald Frederickx (G-tec, Belgium)
- Timo Gaida (TNO, Netherlands)
- Oliver Geisler (Eggers Gruppe, Germany)
- Marco Gilissen (Fugro, Netherlands)
- Miłosz Grabowski (IOPAN, Poland)
- Matthias Grün (Eggers Gruppe, Germany)
- Joseph Hine (Vattenfall Vindkraft, Sweden)
- Vincent Hoffmann (UXSolutions, Belgium)
- Arndt Johnsen (FFI, Norway)
- Rasmus Juncher (Vattenfall Vindkraft, Sweden)
- Tommy Kaltofen (Atlas Elektronik, Germany)
- Mareike Kampmeier (GEOMAR, Germany)
- Mikkel Klahn (Vattenfall Vindkraft, Sweden)
- Wim de Klerk (TNO, Netherlands)
- Gorden Konieczek (Sensys, Germany)
- Tobias Kulgemeyer (Boskalis Hirdes EOD Services, Germany)
- Michiel Künzel (League Geophysics, Netherlands)
- Nick Lawrence (EdgeTech, UK)
- Øivind Midtgaard (FFI, Norway)
- Peter Nieuwveld (Fugro, Netherlands)
- Kevin Rychert (EdgeTech, UK)
- Holger Schmaljohann (WTD 71, Germany)
- Jan-Philipp Schmoltdt (Tauber-Herklotz-Consult, Germany)
- Marc Seidel (GEOMAR, Germany)
- Bart van der Speeten (Adede, Belgium)
- Manfred Stender (Fugro, Germany)
- Matthias Strahser (Eggers Gruppe, Germany)
- Wolfgang Süß (Sensys, Germany)
- Annelies Vanstrealen (Ørsted, Denmark)
- Christina Walter (Tauber-Herklotz-Consult, Germany)
- Patrick Wetzel (Sea Terra, Germany)
